Evergreen Growers Supply	Oregon City,	Ore.	(503) 631-7954	(West Coast)	

The list of pests keeps increasing, but the continuing research program at Applied Bio-Nomics ensures that new biological products are under development. Research is also underway for regular commercial application of biological control agents in Canada. In 1990 Applied Bio-Nomics formed a commercial joint venture with Plant Product Co. and Westgro Sales Inc. to distribute biological control agents in Canada.
